

Gain A Global Perspective

Nicole:

Hi, my name is Nicole.

Simone:

My name is Simone.

Kenny:

My name is Kenny.

Paul:

My name is Paul.

Speaker 5:

And I'm a Client Director.

Speaker 6:

I'm a Senior Business Analyst.

Speaker 7:

Program Manager.

Speaker 8:

Personal Insurance Operations.

Speaker 9:

I work in the Science Team here at AIG.

Nicole:

I think working for an insurance company is compelling, but especially working at a company like AIG.

Simone:

What was inspiring to me, and the reason why I ultimately came to AIG, was that it was an organization — and insurance as an industry is — committed to constantly growing with the rest of the world.

Speaker 6:

That was actually something that was really important to me being in a role that was global.

Kenny:

AIG gives me the possibilities and the opportunity to travel across the world and to see different cultures and walks of life.

Speaker 7:

I've done work in Japan, Singapore, India.

Speaker 8:

It allows for greater collaboration between teams, greater acceptance of different viewpoints.

Simone:

There's always a commitment to making sure junior talent is in the room.

Paul:

If you want to learn something or if you want to get involved in something new, you have the opportunity to do so and to grow and learn new things.

Speaker 8:

That ability to work on really meaty projects, that exists here.

Speaker 9:

Not many people can say that within two years of their career, they were given this opportunity and responsibility to manage a project that looks after 12 different countries.

Simone:

I find myself sitting in meetings where everything's going through the motions. Somebody always goes, "Okay, stop. Let's think outside the box."

Speaker 5:

Every day we solve our clients most difficult risk problems.

Paul:

Many of us are required to collaborate with a diverse set of people that have diverse ideas.

Speaker 7:

We have invested in new systems. We've looked at our processes.

Nicole:

We try not do things just because we've always done it that way in the past. We're always trying to think differently.

Speaker 9:

It's either you're going to lead or be led. Right? And I think having the emphasis in science and analytics here at AIG really puts AIG in a great position to be the leader in the insurance industry.

Speaker 8:

The opportunities with the AIG are endless.

Simone:

This is my first job. So, this has been really great to just get this level of confidence so early on.

Speaker 6:

Once you kind of open the door and take a look at what's actually there, you realize that there's a lot of opportunities.
